In the wake of COVID-19 and a rapid shift to remote work, the risk and frequency of ransomware attacks are on the rise. According to recent data from VMware Carbon Black, ransomware attacks have increased 148% from February to March 2020 alone. Additionally, these attacks have quickly matured, with cyber criminals using new and more disruptive campaigns to gain access to and encrypt your data. In this webinar West Monroe and guest panelists will walk through a real-time incident and share critical perspectives from each phase of the event life cycle. You will hear from key stakeholders including a breach coach, insurance carrier and industry leaders who have navigated a ransomware event in real-time: How, in hindsight, could they have been better prepared to expedite recovery? Concluding the panel West Monroe will share actionable steps for what you can do right now to harden your environment and improve cyber resiliency.

Join West Monroe's Panel of Speakers:

- Joe Nogel, Vice President and Chief Financial Officer, Eli's Cheesecake Company
- Andrew Topp, Senior Architect, West Monroe
- Melissa Ventrone, Partner, Clark Hill
- Kevin Sherry, Head of Cyber Liability, Everest Insurance

Continuing Education Offered:

- 1.00 HRCI credits for approval
- 1.00 SHRM credits for approval
- 1.00 CLE credits per attendee request prior to event
- 1.00 HR & Management/Supervision Compliance credits
