

Solar NABCEP Associate Exam Prep

Fulfill the eligibility requirements to take NABCEP's Photovoltaic Associate exam with Ingenuity's 60 hour online prep class.

CNM Ingenuity, Inc.

Photovoltaic (PV) is electrical energy from the sun. This course is an introduction to the fundamentals associated with Photovoltaic systems.

Including:

- PV market analysis
- the solar resource
- electrical PV principles
- solar module fundamentals
- system components
- types of systems
- site assessment
- system applications
- energy production analysis
- best practice code compliant practices (including mounting, wiring, and interconnecting systems to the utility.)

Anyone interested in knowing more about the solar industry or anyone working in fields associated with solar energy will benefit from this course.
