

## In-Person Education & Training Series

### Data-Driven Energy Management

Upgrading to energy-efficient equipment can reduce energy expenses year after year.

It's possible to increase energy efficiency and improve occupant comfort! PowerShift by NV Energy offers strategies to enhance building performance and save energy. Join our Business Energy Services experts and learn about the latest trends to help you save. We're serving knowledge and lunch at this free in-person event!

- Learn about benchmarking techniques and how to measure savings goals
- Understand the key metrics to help prioritize energy efficiency projects
- Explore energy-saving measures and project ideas
- Discover what incentives are available for your business
- Get access to the resources you need to start a project today

**Register for in-person training - lunch is included!**
