

Algebra Refresher

Algebra Refresher is a learning and mastery-based course that is designed to prepare students, who have not met the criteria to be placed into Math 95 or higher, with the necessary skills to be successful in entry level mathematics courses. The course will be a 8-week class where students will work through an individualized work path comprised of homework problems and knowledge checks. The learning path will be completed through an online course delivery system where students can work at their own paces. Students could advance up to Calculus I through this course. At the end of the course, the students will receive a placement based on their final assessment, which will be good for two years.
